Dear FishCat Investor,

It is because of your contribution and participation in our conservation actions that we have been able to reach out to and educate **over 2,000 local villagers and their children** in India and Sri Lanka during 2018-2019.

Thank you from Fishing Cat Conservancy!

The FCC Trust has been working with local farmers in India to restore mangroves in their fish and shrimp farms. We're trying to move farmers towards chemical-free, forest-based livelihoods while also connecting them with niche seafood markets that will provide better, more stable incomes than unsustainable fish and shrimp farming.

More mangroves also mean better habitat for fishing cats and their prey, and the creation of carbon sinks to help address climate change!

[Read more](#) on this and how we're using [conservation camps](#) to self-sustain the FCC Trust.

[View Article](#) to learn more about how Srichakra Pranav Tamarapalli and Co are giving the mangroves of East Godavari all the attention they need.

Photo: TED Conferences 2019

In April 2019, we were given the rare honor of having Ashwin Naidu, our CEO, being named a [TED Fellow](#). Ashwin's TED talk is [now online](#), and we're excited to share it with you!

Fishing Cat Conservancy also now has an expanded mission and a trade name - FishCat / FishCat.org - working to empower local people with conservation jobs and alternative livelihoods such as monitoring fishing cats and planting mangroves. Contract-based incentives can encourage people to protect and restore these crucial ecosystems.

We estimate that as little as \$1 can help protect and restore 1 sq. ft. of the forest, and so we're looking to raise as much money as possible for mangrove conservation in South and Southeast Asia.

For the sustainability of our program, please consider making a recurring contribution through our [PayPal Giving Fund](#) page, or by joining our [Grapevine](#) Giving Circle - we also post our quarterly field updates here.

2019 has been an amazing year for the Fishing Cat Conservancy.

In January, we registered FCC Trust as a non-profit group in India. The Trust's [conservation camps](#) are now immersing citizens from around the world about fishing cat conservation, and it is working with local landowners to [restore mangrove forests](#) and create stable, sustainable [jobs](#).

This has also been a banner year for outreach. Talks all over the world – including the TED 2019 conference in Vancouver – have taught thousands of people about the importance of fishing cats and their mangrove habitats, and led to crucial new partnerships for the FCC.

None of this would have happened without you – your support has made these achievements possible, and it enables us to keep advocating for fishing cats, mangroves, and local communities.

Therefore, from everyone at the FCC: thank you. You made a real difference for conservation in 2019, for which we are incredibly grateful.

For more information about what your contributions have enabled us to do, please check out our [Facebook page](#)!
